

Emu Quick Start Guide

In the box

1. Emu Classic
2. Battery
3. Charger
4. Pedals
5. Keys
6. Tool kit

Battery

Familiarise yourself with the battery section in the manual. Charge the battery fully before first use using the supplied charger.

Set up bike – handlebars and pedals

Your Emu bike arrives 98% assembled. This means all you need to do is attach the pedals and fix the stem into position.

Pedals

1. The pedal axles are labelled 'R' and 'L' for the 'right' and 'left' (when sitting on the bike).
2. Choose the appropriate pedal and insert it into the corresponding crank arm. Turn both pedal axles towards the front of the bike (left pedal turns anti-clockwise, and the right pedal turns clockwise). If it doesn't turn easily, do not force it. Check you have the correct pedal and are inserting it level at 90 degrees to the crank.
3. Thread both pedals into the crank arm as far as you can by hand. Then fully tighten to 30Nm using the 15mm spanner.
4. Pedals are assigned to left and right, they are not interchangeable.

Stem:

1. With the bike on the ground, line up the handlebars so they are 90 degrees to the front wheel.
2. Using the supplied 5mm allen key, tighten the top cap until it is just tight (do not over tighten).
3. Then, slowly tighten each side stem bolt to 5-6Nm, switching between the two as you tighten.

Tyre Pressure

1. The correct tyre pressure is essential for a safe, enjoyable ride and maximising range.
2. Pump the tyres to your preference within the range indicated on the side wall of your tyre.

Pre-ride final checks

1. Before first use, check all nuts and bolts are correctly tightened and not overtightened.
2. Test the brakes.
3. Check the battery is locked in place.
4. Ensure you have read the manual.

Range

It's important to remember that the range you can achieve with your Emu is significantly affected by the following factors: total load weight (rider + luggage), pedalling force, average speed, tyre pressure, outside temperature, hill gradient, terrain, correct use of gears and age and care of the battery.

Packaging

Your Emu bike arrives in mainly recyclable packaging. Please ensure you recycle the packaging.

Warranty

Be sure to register your warranty online by scanning the QR code with your phone below or online at www.emubikes.com/warranty-registration.

The Emu logo, which is the word "emu" in a white, lowercase, cursive font, set against a red background.
